FEATURED PROJECTS

Distributed Code Engine | *Java, Spring Boot, Docker*

Nov. 2025

- Built a platform where users can write and run C++, Java, and Python code remotely.
- Used Docker to run user code safely in an isolated environment without affecting the main system.
- Set up a system so users can see the output of their code instantly on their screen.

MiniRedis (Multi-threaded Key-Value Store) | *Java, TCP*

Oct. 2025

- Created a custom database tool to store and retrieve data quickly in memory, similar to Redis.
- Built a fast communication system between the client and server using Java Sockets.
- Ensured the program works smoothly and safely even when multiple people try to read or write data at the same time.

L7 Load Balancer | *Java, HTTP Server*

Sep. 2025

- Developed a tool that manages website traffic by spreading incoming user requests across different servers.
- Used algorithms like Round Robin to make sure no single server gets overloaded with traffic.
- Kept track of active connections to ensure requests are handled quickly without delay.

SyncDraw (Collaborative Whiteboard) | *React.js, Socket.io*

Aug. 2025

- Made an online whiteboard where multiple people can draw together at the exact same time.
- Used WebSockets to instantly share drawing updates with everyone connected to the board.

ACHIEVEMENTS & CODING

- **Codeforces** Max Rating: **1133** (Handle: *anshullakra8*).
- Consistently maintained a **9.04/10.0 CGPA** throughout B.Tech curriculum; Scored **93%** in Class XII.
