EDUCATION

Vellore Institute of Technology (VIT)

Bhopal, India

Bachelor of Technology in Computer Science; CGPA: 9.11/10.0

Sep 2023 – Jun 2027

- **Relevant Coursework:** Object-Oriented Programming, Data Structures & Algorithms, Operating Systems, Computer Networks, DBMS, System Design.

TECHNICAL SKILLS

Languages: Java (JDK 21), Python, C++ (STL), JavaScript (ES6+), SQL.

Backend & Systems: Spring Boot 3, FastAPI, REST APIs, Microservices, Docker, Data Engineering, Distributed Systems.

Data Analytics & AI: Pandas, ETL, Tableau, Power BI, Advanced Excel, Streamlit, SciPy, Scikit-learn, Google Gemini API, NLP.

Frontend & UI: React.js, Next.js, Tailwind CSS, Socket.io.

Developer Tools: Git, GitHub, Linux, Postman.

ENGINEERING PROJECTS

Distributed Code Engine | [GitHub](#) | *Java, Spring Boot, Docker, React*

Dec 2025 – Feb 2026

- Built a distributed code execution engine using Java 21, Spring Boot, and Docker sandboxing to securely execute untrusted Java, C++, and Python programs.
- Benchmarked asynchronous task execution using `ThreadPoolTaskExecutor`, significantly improving throughput and reducing execution latency.

ReconAI (AI-Powered Reconciliation Platform) | [GitHub](#) | *Python, FastAPI, React, Pandas, Gemini*

Jun 2026 – Jul 2026

- Built an AI-powered reconciliation platform processing **5,000+** transactions, combining anomaly detection, asynchronous APIs, and interactive dashboards to automate reconciliation workflows.
- Reduced manual reconciliation effort by integrating Gemini-based root cause analysis (RCA), enabling faster investigation of transaction mismatches through an interactive React dashboard.

AI-Powered Customer Analytics Platform | [GitHub](#) | *Python, Tableau, SciPy, Scikit-learn*

Jul 2026 – Aug 2026

- Built a customer analytics platform using SQL, Python, and SQLite to transform raw CRM data into interactive **Tableau** and **Advanced Excel** dashboards tracking customer **KPIs**, providing **decision support**, and identifying revenue risk.
- Developed predictive churn models (Scikit-learn) to identify customer attrition risk, supporting customer retention strategies through statistical A/B testing (SciPy), Cohort Retention, and CLV analysis.

MiniRedis (In-Memory Key-Value Store) | [GitHub](#) | *Java, TCP/IP, Docker, Distributed Systems*

Sep 2025 – Nov 2025

- Engineered a distributed in-memory data store utilizing Java, TCP sockets, `ConcurrentHashMap`, and Docker.
- Optimized the storage engine to support low-latency concurrent operations while maintaining consistency under high client load.

OPEN SOURCE CONTRIBUTIONS

TheAlgorithms (Official Java Repository)

Aug 2026

Open Source Contributor | *Java, Concurrency, Algorithms*

[Pull Request #7544](#)

- Improved concurrent merge-sort implementation (`CompletableFuture`) and strengthened automated testing for an open-source Java algorithms repository.
- Added unit tests and resolved static analysis issues to improve repository reliability.

CERTIFICATIONS

AWS Certified Solutions Architect – Associate (AWS)

Jul 2026

Networking Basics (Cisco)

Apr 2026

Cyber Security Analyst (CECSAIIIN) (IBM)

Jun 2025

Blockchain and its Applications (NPTEL)

Dec 2024

ACHIEVEMENTS

Competitive Programming: Solved **360+** DSA problems across LeetCode & Codeforces (**118 Medium/Hard**).

- Peak Codeforces Rating: **1289** (Pupil); achieved Global Rank **2185** in Codeforces Educational Round 190.
